

Adeesha - Portfolio Projects

Project 1: ML-Powered Resume Scanner

An AI tool that parses resumes and matches candidates to job descriptions using NLP and semantic similarity.

Tech Stack: Python, spaCy, Sentence Transformers, FastAPI, PostgreSQL

Features:

- Resume parsing (PDF, DOCX)
- Skill extraction and matching
- Semantic similarity scoring
- Batch processing for recruiters
- REST API for integration

Impact:

- Reduced screening time by 80%
- Processed 10,000+ resumes
- 95% accuracy on skill matching

Live Demo: resume-scanner.adeesha.dev

GitHub: github.com/adeesha/resume-scanner

Project 2: Sentiment Analysis Dashboard

A real-time dashboard analyzing social media sentiment about brands and products.

Tech Stack: Python, Transformers, Kafka, React, D3.js

Features:

- Real-time tweet analysis
- Sentiment trend visualization
- Alert system for negative sentiment
- Competitor comparison analytics
- Export reports (PDF, CSV)

Impact:

- Monitored 100K+ tweets daily
- Detected PR crises 6 hours faster
- Used by 3 marketing teams

Live Demo: sentiment.adeesha.dev

Project 3: Personal Finance Tracker

An intelligent expense tracker with automated categorization and budget recommendations.

Tech Stack: Python, scikit-learn, React Native, Firebase

Adeesha - Portfolio Projects

Features:

- Bank statement parsing (CSV, PDF)
- Auto-categorization using ML
- Budget forecasting and alerts
- Investment portfolio tracking
- Monthly financial reports

Impact:

- 500+ active users
- Saved users average 15% on expenses
- 4.8/5 app store rating

App Store: Available on iOS and Android
