

Alex Johnson - ML Engineer Resume

CONTACT

Email: alex.johnson@email.com | Phone: (555) 123-4567

LinkedIn: linkedin.com/in/alexjohnson | GitHub: github.com/alexjml

SKILLS

Programming: Python, SQL, JavaScript, C++

ML/DL: PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers

MLOps: Docker, Kubernetes, MLflow, Weights & Biases, Airflow

Cloud: AWS (SageMaker, EC2, S3, Lambda), GCP (Vertex AI), Azure ML

Databases: PostgreSQL, MongoDB, Redis, Pinecone

Specialties: NLP, Computer Vision, Recommendation Systems, Time Series Forecasting

EXPERIENCE

Senior ML Engineer | TechCorp Inc. | Jan 2022 - Present

- Designed and deployed a real-time fraud detection system processing 50K transactions/sec
- Reduced false positive rate by 35% using ensemble methods and feature engineering
- Built automated ML pipeline with MLflow reducing model deployment time from days to hours
- Led team of 4 engineers to migrate legacy models to cloud-native architecture

ML Engineer | DataFlow Systems | Jun 2020 - Dec 2021

- Developed NLP models for customer sentiment analysis achieving 94% F1 score
- Implemented A/B testing framework for ML models serving 2M+ daily users
- Created automated data validation pipeline reducing data quality issues by 60%

Data Scientist | Analytics Pro | Aug 2018 - May 2020

- Built predictive models for customer churn achieving 89% accuracy
- Developed time series forecasting models for demand planning
- Created interactive dashboards for business stakeholders using Tableau

EDUCATION

Master of Science in Computer Science (Machine Learning)

Stanford University | 2018

GPA: 3.9/4.0 | Thesis: Deep Learning for Sequential Recommendation

Bachelor of Science in Computer Science

University of California, Berkeley | 2016

GPA: 3.8/4.0 | Dean's List, ACM Programming Contest Finalist

PROJECTS

1. FraudGuard - Real-time Fraud Detection

- Architecture: Event-driven microservices with Kafka, Redis feature store
- Tech: PyTorch, XGBoost, FastAPI, Docker, AWS SageMaker

Alex Johnson - ML Engineer Resume

- Impact: Detected \$2.1M in fraudulent transactions in first quarter

2. MedNLP - Clinical Text Understanding

- Fine-tuned BERT models for medical entity recognition and relation extraction
- Tech: Hugging Face Transformers, spaCy, PostgreSQL
- Impact: Automated extraction of 15K+ medical records with 96% accuracy

3. RecSysPro - Recommendation Engine

- Hybrid collaborative filtering + content-based recommendation system
- Tech: PyTorch, FAISS, Redis, FastAPI
- Impact: Increased user engagement by 28% in A/B tests
